**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE (3) MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Detailed Office Action**

1. This action is in response to the application **09/731, 631** filed. **December 7, 2000.**
2. Claims **1-23** have been examined.

***Specification***

3. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-23 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by

Art Unit: 2144

Beelitz et al. (USPN 6,182,275 – Date of Patent: January 20, 2001, herein referred to as “Beelitz”).

6. As to claim 1, Beelitz teaches the invention as claimed, a method of selecting an operating system at a target device in communication with a server, comprising: initiating a network bootstrap program at the target device (col.14, lines 66 to col.15, line 5); sending a bootstrap list command from the target device to the server (col.14, line 66 to col.15, line7); receiving an operating systems list of at least one operating system prior to executing an operating system at the target device (col.15, lines 1-7); and selecting a target operating system from the operating systems list (col.15, lines 5-12, and col.16, lines 30-40).

7. As to claim 2, Beelitz teaches the invention as claimed, further comprising: receiving instructions for the target operating system (col.14, lines 57-65).

8. As to claim 3, Beelitz teaches the invention as claimed, further comprising: requesting the instructions for the target operating system from the server (col.14, lines 65-67) .

9. As to claim 4, Beelitz teaches the invention as claimed, further comprising: booting the target operating system based on the instructions (col.14, lines 60-65).

10. As to claim 5, Beelitz teaches the invention as claimed, wherein the operating

systems list includes a default operating system (col.7, lines 49-54).

11. As to claim 6, Beelitz teaches the invention as claimed, further comprising: relocating the network bootstrap program after the target operating system is selected (col.8, lines 40-45).

12. As to claim 7, Beelitz teaches the invention as claimed, wherein the target operating system is determined from a configuration file of the target device (col.18, lines 60-65, and lines 5-10).

13. As to claim 8, Beelitz teaches the invention as claimed, wherein the target operating system is selected by a user of the target device (col.15, lines 5-12).

14. As to claim 9, Beelitz teaches the invention as claimed, further comprising: determining from a user profile, at least one-available operating system; and including the user-available operating system with the operating systems list (col.7, lines 49-56).

15. As to claim 10, Beelitz teaches the invention as claimed, further comprising: determining from a target device profile, at least one device-available operating system; and including the device-available operating system with the operating systems list (col.7, lines 49-56).

16. As to claim 11, Beelitz teaches the invention as claimed, including a computer program product in a computer usable medium for selecting an operating system at a target device, comprising: means for initiating network bootstrap program code at the target device (col.14, lines 66 to col.15, line 5); means for receiving a command requesting an operating systems list of at least one operating system (col.14, line 66 to col.15, line7); means for sending the operating systems list to the target device before an operating system is executed at the target device (col.15, lines 1-7); and means for receiving a selection of a target operating system from the operating systems list (col.15, lines 5-12, and col.16, lines 30-40).

17. As to claim 12, Beelitz teaches the invention as claimed, further comprising: means for sending the target operating system to the target device (col.7, lines 35-40).

18. As to claim 13, Beelitz teaches the invention as claimed, further comprising: means for determining a default operating system (col.17, lines 10-19).

19. As to claim 14, Beelitz teaches the invention as claimed, further comprising: means for relocating the network bootstrap program code after the target operating system is selected (col.8, lines 40-45).

20. As to claim 15, Beelitz teaches the invention as claimed, further comprising: means for determining the target operating system from a configuration file of the target device (col.18, lines 5-10, and lines 60-67).

21. As to claim 16, Beelitz teaches the invention as claimed, further comprising: means for receiving the selection of the target operating system from a user of the target device (col.15, lines 5-12).

22. As to claim 17, Beelitz teaches the invention as claimed, further comprising: means for determining at least one operating system available to the user (col.7, lines 35-56).

As to claim 18, Beelitz teaches the invention as claimed, including a network data processing system comprising: means for initiating a network bootstrap program at a target device (col.14, lines 66 to col.15, line 5); means for sending a command requesting an operating systems list of at least one operating system (col.14, line 66 to col.15, line7); means for receiving the operating systems list prior to executing an operating system at the target device (col.15, lines 1-7); and means for selecting a target operating system from the operating systems list at the target device (col.15, lines 5-12, and col.16, lines 30-40).

23. As to claim 19, Beelitz teaches the invention as claimed, further comprising: means for receiving the target operating system at the target device (col.15, lines 2-7).

24. As to claim 20, Beelitz teaches the invention as claimed, further comprising: means for executing the target operating system at the target device (col.5, lines 37-42).

25. As to claim 21, Beelitz teaches the invention as claimed, further comprising: means

Art Unit: 2144

for relocating the network bootstrap program after the target operating system is selected  
(col.8, lines 40-45).

26. As to claim 22, Beelitz teaches the invention as claimed, further comprising: means  
for determining the target operating system from a configuration file of the target device  
(col.18, lines 5-10, and lines 60-67).

27. As to claim 23, Beelitz teaches the invention as claimed, further comprising: means  
for determining the target operating system from input of a user of the target device (col.2,  
lines 9-17).

***Conclusion***

28. Any inquiries concerning this communication or earlier communications from  
the examiner should be directed to **Tammy T. Nguyen** who may be reached via telephone at
